

Hundred Reasons, Silver

See you around as a friend
Eight days the same you'd bore me just leave it
We prefer lies after rain
She said leave it i can't leave it
Say what you wanted to ask me
While you were sitting down
Say what you wanted to ask me
You opened up now
Fake plastic smiles to play games
Please call my name ignore me and feel it
I thought that i had won gold
She said leave it I can't leave this
Say what you wanted to ask me
While you were sitting down
Say what you wanted to ask me
You opened up now
Take it or leave it
Say what you wanted to ask me
While you were sitting down
Say what you wanted to ask me
You opened up now
Take it or leave it
