

# iann dior, thought it was (feat. Machine Gun Kelly)

I lost my mind, chasing a feeling  
In the hills at night, city of angels  
But it hurts sometimes, finally made it  
But it don't feel right, don't feel like I thought it would

I've been on the graveyard shift I got everything I wish mm da da  
Couple diamonds on my wrist  
But I really miss my  
I've been crying inside so you can't see my pain  
The high went away and they all did the same  
Broken heart that I can't stich  
All the money in the world can't fix this

I feel so alone in Californial got all these friends don't even know one

I lost my mind, chasing a feeling  
In the hills at night, city of angels  
But it hurts sometimes, finally made it  
But it don't feel right, don't feel like I thought it would

I'm by myself  
In a room with a million faces  
I can't find home  
And I've been to a million places  
All I've ever known, is the black hole  
That I call my soul, this my last hope  
Before I let go, I cant breathe I'm sinking low  
So I use smoke to get high I mean I use this to hide  
Cause I'm not ok in side I fight this every night, cause

I lost my mind, chasing a feeling  
In the hills at night, city of angels  
But it hurts sometimes, finally made it  
But it don't feel right,  
Don't feel like I thought it would  
I lost my mind, chasing a feeling in the hills at night, city of angels  
But it hurts sometimes, finally made it  
But it don't feel right, Don't feel like I thought it would  
Don't feel like I thought it would  
Don't feel like I thought it would
