

IdleMiND, Backdoor

Crawl on this floor, and I'll give you what you want
I'll filter out your pain, leave you with nowhere to go
Down dry and sore, I'll kill you if you want
Born again just to die again, and soon I'll be your only friend

Lie down on needles, dig me a grave
Inside your head
Bury me deep under the dirt
Where I'll live until you're dead
Where I'll live until you're fucking dead

Trade eyes with a fly, and there's nothing you won't see
Numb and dumb with a newly installed wing for cerebral fallacy
Take me in close to your heart, and keep me there for a while
I'll turn your love to stone cold hate and eternally kill your smile

Lie down on needles, dig me a grave
Inside your head
Bury me deep under the dirt
Where I'll live until you're dead
Where I'll live until you're fucking dead

You're a whore with me, bore without me
You're dead with me, but you're fucked without me
You're a whore with me, bore without me
You're dead with me, but you're fucked without me

You're a whore
You're a whore

I caress my heart with blades, won't you try and do the same?
I will solely sodomize your every principle with pain
Let me breed inside your head, I'm the bomb you want to blow
Defecate a warning sign, and then attempt to kill the show

Lie down on needles, dig me a grave
Inside your head
Bury me deep under the dirt
Where I'll live until you're dead
Where I'll live until you're fucking dead
