

# IdleMiND, Scissorgum

Polaroid pretty pucker up for some pity  
Cut your wrinkles with a steakknife and they'll eat you all up  
Shiny little piggy, oh you are, yes you're pretty  
But they'll only take your picture then they'll eat you all up

Ricochet. Recollect  
Hell without its dialect  
Uninviting room made for the unintended visitor

Wrap me in barbed wire  
Roll me in the fire

Fill my void with pity, stick your needles in that piggy  
Kill kill, throw throw, away with the rest of them  
Tell me I'm gonna die. One day you're gonna fucking die  
I'm a stone, I have no hero  
Love is a ride straight back to zero

Ricochet. Recollect  
Hell without its dialect  
Uninviting room made for the unintended visitor

Wrap me in barbed wire  
Roll me in the fire

The television, the television  
The television is running  
The television is running  
The television is running through every vessel in my veins

Wrap me in barbed wire  
Roll me in the fire

All will fall  
And fall you all will

This will grow. This will spread  
This will get stuck in your head
