Ima Robot, 123 (Here Come The Doctors)

Twelve equals three A line wrapped around a string Girls in the classroom Concentrate, boy! A line around gravity Spiritual individual Corrosion and humanity The mathematics of love And the science of sanity

Living it up in the atmosphere Nobodys dies if the heart is here

Kiss me goodbye

For the doctors are comin'

We all know why

Because I wasn't born

Here we go again

As time passes by here

We don't live and lie here

We're all going to die

In the end

Standing on the corner Holes in my shirt Girls drivin' by Oh come here, don't flirt 'Cause she's never had a girlfriend And I don't want one either And I don't want the people Knowing that I was smoking ether I've been thinking about science In my spare time I've been thinking about the reason To the rhyme, heck yea

Livin' it up in the atmosphere Nobody dies if the heart is here

Kiss me goodbye For the doctors are comin' We all know why Because I wasn't born Here we go again As time passes by here We don't live and lie here We're all going to die In the end

Kiss me goodbye For the doctors are comin' We all know why Because I wasn't born Here we go again As time passes by here We don't live and lie here We're all going to die In the end

Rock science And people got talk talk science And people see stars sometimes And some people raise cadavers But not me, I see The sun is made of string Lights out from the underworld People talk about God Are they insane? I don't think so I say they're maybe spreading some love Spreading it around And it feels good In your skin
