

# Ima Robot, Time Is The Cure

You said I was the dirtiest man you'd ever met  
And then I told you I don't like your pets  
You moved in the next day and we made love  
Then you sneezed on my bed sheets and we laughed  
And you said, "I was you, and you were me."  
And I said, "What selfish people we must be."

Is this what they write those movies about?  
Is this the adventure you're talking about?  
Well spin me round and spin me inside and out  
Today profess your love for when we love a million more  
Time is the only cure

Well the years slipped like napkins through my hands  
Those days were hard to get me in you understand  
And we danced to our LPs at the record speed of 45  
But then your record skipped and our dances didn't jive  
And you said, "You were you, and I was me."  
Well I said, "Well I guess you better leave."

'Cause this was not what they write those movies about  
Well spin me round and spin me inside and out  
Today profess our love for when we love a million more  
Time is the only cure

Don't need to be sad  
We're gonna win  
You know that I love you  
You know that I love you  
You know that I love you

'Cause this is what I thought they write those movies about  
This is the adventure that you're talking about  
You spin me round and spin me inside and out  
Well when the world ends don't just scream and shout  
Today profess my love for when I love a million more  
Time is the only cure
