

# Imelda May, Kentish Town Waltz

Do you remember we traipsed around  
From pub to pound shop through Kentish Town  
Only a fiver to our name  
The drunk on the doorstep had more to our shame  
Living over the offy had its trials  
The fights all night out there and inside  
And those stews that lasted three days into four  
And those dreadful bailiffs return to our door

But we stuck with each other with all our might  
We pulled it together ans held on tight  
And I'm glad for us, yeah I'm glad mo chroi  
But its nothing to anyone cept you and me  
There are wrongs for every right, theres ups and theres downs  
But you're the one for all my life  
My true love I have found, yeah you my love I found

I watched the moon cover the might of the sun  
That weird evening light at a quarter past one  
And I knew in my head as you lay in our bed  
That you'd stay in my heart till the day I was dead  
We killed each other then loved in time  
And laughed till we almost cried  
Yeah we cried as well when it all went to hell  
And my heart it broke till I swear it died

But we stuck with each other with all our might  
We pulled it together ans held on tight  
And I'm glad for us, yeah I'm glad mo chroi  
But its nothing to anyone cept you and me  
There are wrongs for every right, theres ups and theres downs  
But you're the one for all my life  
My true love I have found, yeah you my love I found

Oh you're good at the things that I'm hopeless at  
And I noticed what you ignore  
But its when I see you're not perfect for me  
Its then I love you more and more

And we stuck with each other with all our might  
We pulled it together ans held on tight  
And I'm glad for us, yeah I'm glad mo chroi  
But its nothing to anyone cept you and me  
There are wrongs for every right, theres ups and theres downs  
But you're the one for all my life  
My true love I have found, yeah you my love I found  
Ohhh There are wrongs for every right, theres ups and theres downs  
But you're the one for all my life  
My true love I have found, yeah you my love I found
