

In Fear and Faith, The End

Hold strong come from behind.
Take them down!
Replace fear with pride, hold your ground
We've made our choice, between life and death.
And we chose to die.
We tried changing the past, or so they say...
Please wake me up...
Because this is, yes this is the way we will end.
Don't look back there is nothing left!
And this is why we run, run.
Save us from the end of everything we know.
Sold ourselves out.
Even though we are nearing the end.
And this is why we run, run.
Save us from the end of everything we love.
We'll give them nothing, we'll take everything from them
So take your best shot.
Give it your all and we'll do the same.
Just remember that everyone will know our name.
We live forever, no one could ever take our place.
We will be erased!
Take our hands and lead us away
We took the hard road.
We fight alone to save our name.
We know the difference, you are the ones to blame
