

# Inc., The Place

At first hold me by her side  
I know I have to try  
You'll be my best because  
I saw you

I know it's something new  
Way I feel might as look  
That is why I'm at my best

It's here like you already know  
It's here like you already know  
I feel like we've been here before  
I feel like we've been here before

Time makes it strong  
In the sky can sing the song  
Over there, where we could go  
Never right, never wrong,  
Over there?

It's here like you already know  
It's here like you already know  
I feel like we've been here before  
I feel like we've been here before  
The place we already know,  
the place that we already know  
I feel like we've been here before  
I feel like we've been here before

The place we already know,  
the place that we already know  
I feel like we've been here before  
I feel like we've been here before  
The place we already know,  
the place that we already know  
I feel like we've been here before  
I feel like we've been here before.
