

# Incognito, As Long As It's You

Something 'bout April, that makes me come alive  
May have been the winter that made my heart so still  
It must have been, must have been  
What wakens us all to wonder, I don't really know?  
But the best days of my life are the one's I spent with you

So continue to surprise me, baby I'll do the same for you  
No I won't question why it feels so good  
I'll let the mystery be

As long as it's you  
As long as it's you  
Any time, anywhere, I don't care  
Just as long as it's you

Thank you for your understanding  
Cos I know my love can be so demanding  
(I know that I can)  
Yes I know that it means so much to you  
Baby when I treat you right  
And I'm holding you tight  
Tears of joy come to your eyes  
Like stars about to fall  
Continue to still want me, the way I still want you  
I won't question why it feels so good, I'll let the mystery be
