

Inhaler, A Question of You

You killed the morning
You called me up
Poured your heart out into my cup
Words of desire
Are they enough
What is it you were trying to make up?

And that is the question
I'll ask
It's the only question
And that
Is a question of you

Can't believe we got left where we're left
Can't be old if we don't wanna be grown
Sing me a love song
I know the words
Tell me a story but I already heard
I think I figured you out (I found out)
Yeah, I found out (I found out)
Took me a while to find (I found out)
The answer to the question (I found out)
I am the answer to the question

When we were younger
I could split the sea
You could move the earth just for me
Wasn't five million years since you fell to earth
And now we've nothing more for all our worth

And that
Is the question
I'll ask
It's the only the question
And that
Is a question of you

Can't believe that we got left where we're left
Can't be told if just don't wanna know
I wanna live for it
Driving the car
Keep to the right here baby
We've come so far

If I play with you
Oh
And if it's true
If it's true

And that is the question
I'll ask
It's the only question
And that
Is a question of you

I found out
(I found out)
Yes I found out (I figured it out)
(I found out)
Took me a while to find (I figured it out)
(I found out)
The answer to the question (I figured it out)
(I found out)
I am the answer to the question of you
