

# Inna, Breathless

You leave me wanting something  
Something that I can't explain  
I thought it was nothing  
But now I can't explain my fate

You pull me closer than I've been before  
The touch of your body got me wanting more  
The better the high the further you fall  
And I wanna fall in  
Fall in now

You leave me breathless I  
Wanna be breathless every night  
Don't wanna say goodbye  
When I'm in the moment  
You leave me breathless I  
Wanna be breathless all my life  
Don't want to leave tonight and  
Drift out of focus

Play with my emotions  
Show me that you need me too  
We won't leave here broken  
If our hearts decide to tell the truth

You pull me closer than I've been before  
The touch of your body got me wanting more  
The better the high the further you fall  
And I wanna fall in  
Fall in now

You leave me breathless I  
Wanna be breathless every night  
Don't want to say goodbye  
When I'm in the moment  
You leave me breathless I  
Wanna be breathless all my life  
Don't want to leave tonight  
And drift out of focus

You pull me closer than I've been before  
The touch of your body got me wanting more  
The better the high the further you fall  
And I wanna fall in  
Fall in now

You leave me breathless I  
Wanna be breathless all my life  
Don't want to leave tonight  
And drift out of focus
