

Inna, I Follow

I had a dream, the sweetest dream
It was just the two of us nobody else but you
It was ideal, deal, could you make it real, real
'Cause every time I want you close, you disappear

And now my mind is over there
My body is over here
Baby just make the puzzle right
My mind is over there
My body is over here
Baby I need you to, ooh ooh

Take me by the hand
And just hold me 'till the end
You know I'll follow, follow, follow
I follow, follow, follow
Take me by the hand
I'll be both lover and a friend
You know I'll follow, follow, follow
I follow, ah

I'm ready for your love and more
Just like a melody that needs the right harmony
So come on close, close, and give me that dose, dose
'Cause every time that you're away I want you close

And now my mind is over there
My body is over here
Baby just make the puzzle right
My mind is over there
My body is over here
Baby I need you to, ooh ooh

Take me by the hand
And just hold me 'till the end
You know I'll follow, follow, follow
I follow, follow, follow
Take me by the hand
I'll be both lover and a friend
You know I'll follow, follow, follow
I follow, ah

Take me by the hand
And just hold me 'till the end
You know I'll follow, follow, follow
I follow, follow, follow
Take me by the hand
I'll be both lover and a friend
You know I'll follow, follow, follow
I follow, ah
