

# Iron Savior, Firestorm

Contemplating  
Investigating the mind  
Strange dimensions  
To which I've been blind  
Shifting realities  
Time has no meaning  
A seeker of knowledge  
The source of all things

Visions of darkness  
Stroke me like a flash in the night  
I have to leave the temple and fight

Into the eye - into the eye of the firestorm  
Into the darkness, into unknown  
Under attack - under siege  
And when the day is born  
I'm diving into the storm  
Firestorm

On my journey through space and time  
I saw the evil before  
It came from far beyond the abyss  
And now it's coming ashore

Civilizations of the galaxy  
You must alliege in unity

Into the eye - into the eye of the firestorm  
Into the darkness, into unknown  
Under attack - under siege  
And when the day is born  
I'm diving into the firestorm

[Solo Piet]

Burning worlds and fire from the skies  
But our hope is the last - the last thing to die

Into the eye - into the eye of the firestorm  
Into the darkness, into unknown  
Under attack - under siege  
And when the day is born  
I'm diving into the firestorm  
Firestorm
