Iron Savior, Fistraiser

Iron fists are pumping The beat is driving hard Cutting like a razor They're riffing down the chords Sweat is dripping on the floor In the gleaming light The beast is breathing fire Thunder strikes the night

Living for the moment Living for the day Don't care for tomorrow Don't care what they say Raise your glasses high

And keep that fire burning Keep the amber hot Never lose the thunder Never stop to rock Raise your fist And set your spirit free Heavy metal Is our chosen way to be

Furious, going wild Rocking to the beat Soaking up the energy The power and the heat

This is the medicine The one and only cure No flavours added It's sheer and pure So if you're feeling ill Just take the pill

And keep that fire burning Keep the amber hot Never lose the thunder Never stop to rock Raise your fist And set your spirit free Heavy metal is our deal

[Solo Piesel / Piet]

Out there is a shadow Lurking in the dark Creeping up unseen Straight in your heart Take heed - when indifference Is trying to take your soul Turn on the music And get back in control

This is the drug The one and only cure No flavours added Sheer and pure Raise your glasses high

And keep that fire burning - OH OH OH And keep the amber hot - OH OH OH No, never lose your thunder - OH OH OH Come on and raise your fist Bang your head

And keep that fire burning Keep the amber hot Never lose your thunder Never stop to rock Raise your fist And set your spirit free Shout it out Loud and proud Heavy metal Is our chosen way to be
