Iron Savior, Mind Over Matter

[Music and lyrics by P. Sielck] [All vocals by Piet]

Am I alive, do I exist Am I the goddess of justice A body of metal, a mind made of circuits Although I think and I'm conscious What is my species, where is my soul or am I dead as a rock

Is this my spirit or just a program written on memory blocks

What is my aim I am what can't be A mind in a digital brain

It is the mind - mind over matter The power has brought me to live In lakes of doubts and oceans of my questions I had to dive Give me guidance - in torrents of time Give me answers - creators of mine from the past Mind over matter at last

So much to learn, so much to see So many things to explore Too little I know, am I a being or just a failure at all

Please heal my pain The silence of ungiven answers will drive me insane

It is the mind - mind over matter

Conscious or dead - beginning or end Mind of circuits - heal the pain Going insane - lakes of doubts Torrents of time - oceans of questions Creators of mine Answers I need guidance I want Conscious or dead - beginning or end

[Solo: Piet]

It is the mind - mind over matter
