

# ItaloBrothers, Winter Air

(Winter air)  
(Winter air)

It's started snowing baby  
The cold wind's blowing baby  
You hold my hand by the fireplace

This day is special baby  
This night's so precious baby  
And all I need is to see your face

Why don't we just stay here  
Here's to where we came from  
Winter air, winter air  
Baby, let's just stay here  
We got it all and then some  
Winter air, winter air  
Winter air

My favorite eyes are shining  
A light that's almost blinding  
The brightest stars  
I will ever see

My favorite voice is singing  
A sound forever ringing  
Deep in my heart  
It will always be

Why don't we just stay here  
Here's to where we came from  
Winter air, winter air  
Baby, let's just stay here  
We got it all and then some  
Winter air

Winter air

Why don't we just stay here  
Here's to where we came from  
Winter air, winter air  
Baby, let's just stay here  
We got it all and then some  
Winter air
