

# Jaci Velasquez, Love Will Find You

Love Will Find You

English version of Llegar a Ti

Oh-oh, oh-oh.

A blue moon

Is the only light that falls upon your room --

Your cold room.

Too soon

There'll be another empty morning in your life,

But you'll try again.

Though the sun

Is the only warmth that shines within your heart --

Your cold heart....

Oh how your dreams have been forsaken,

And now it seems your hope's mistaken;

But just when you're sure your world is breaking,

(Love will find you)

And It will heal a heart that's grieving.

(Love will find you)

You've gotta see,

You've gotta see.

(Love will find you)

When you believed you'd stopped believing.

(Love will find you)

Love will find you....

Bright lights

From the streets that wind a way across the night,

(A way through the endless night...)

Oh the endless night.

You might go on searching in the shadows waiting there,

Already where you run

Like a lost and lonely ghost upon the wind

And cry again.

Hoping to lose the pain you're holding (you're holding),

Walk through a door that's always open (always open)

Into a Promise never broken!

(Love will find you)

Love will find you,

And It will heal a heart that's grieving.

(Love will find you)

It will find you,

You've gotta see

You've gotta see.

(Love will find you)

Love will find you,

When you believed you'd stopped believing.

(Love will find you)

Love will find you....

Oh-oh-oh, oh-oh-oh,

You'll walk the pain that you've been holding --

Walk through a door that's always open

Into a Promise never broken.

(Love will find (find) you.)

Love will find you,

(Love will find you) oh....

(Love will find you)

When you believed you'd stopped believing.

(Love will find you)

Oh, you've gotta see.

Oh, you've gotta see,

You must believe!

(Love will find you)

Oh, someday you'll mend the fear.

Oh,...

You must believe (you must believe),

You must believe....

Whoo-oooh,

You must believe. Oh-oh-oh....
