## Jack Bruce, Criminality

I get a little tired when the sun goes down I get a little wired livin' underground Fascinating fire ain't no one around Feeling some desire Nothing going down

I get a little tired Tired Feel it comin' down Come down

Now the night has come And the flame has gone And I heard them say it On the wireless It's so cold inside There's no place to hide On the wireless What they said was true Life don't wait for you And it's gone Gone
