

Jack Frost, Threshold

I can barely bear to be with you tonight
I can hardly stand to see you in this light
How can I even try to deny it
I can barely bear to be with you tonight
How long will you keep me waiting
I can only hold you in the dream tonight
I won't even think what claims you've made tonight
How can I even try to deny it
I can only hold you in the dream tonight
[Repeat verse 1]
