

# Jack Russell, Whatever It Takes

baby i know the way you feel yeah i know what it takes to keep you  
and baby i know just where you've been yeah i know whatever it takes to keep it real  
whatever it takes to keep you  
and baby i'd give you all i have i hope you know without you i'm nothing  
and i just want to tell you something whatever it takes  
i just want to hold you forever never let this feeling go  
lying here together i just want to let you know  
that in my life i'm right where i should be  
and you're the very best part of me  
baby i know inside your heart yeah i know there's room for growing  
and baby i love the way you love me i hope you know without you there's nothing  
i'm going to give you all my loving whatever it takes  
i just want to hold you forever never let this feeling go  
lying here together i just want to let you know  
that in my life i'm right where i should be  
and you're the very best part of me  
and in my perfect dream i'm dreaming of your touch  
and in my perfect world you've always meant so much  
i'm here with you now and forever whatever it takes my love  
and now that you know the way i feel about you you're going to see we'll be all right  
together we'll embrace the years in sight whatever it takes  
i just want to hold you forever never let this feeling go  
lying here together i just want to let you know  
that in my life is right where you should be  
and you're the very best part of me  
you're the very best part of me
