

# Jack's Mannequin, Annie Use Your Telescope

It started feeling like October  
I got stranded on the road  
But you know where to find me  
Anytime you want me Annie

Annie use your telescope

So they made my life into a movie  
As if I could forget those years  
But I know where the time's gone  
Just not where my mind's been wandering

Annie use your telescope

When it's late don't stop looking  
When my eyes turn to glass  
When it's late don't stop Annie  
I will make it

Home

Is there anybody out there?  
Hello?  
I'm only getting farther from Earth

It started feeling like October

Annie Use Your Telescope

When it's late don't stop looking  
When my eyes turn to glass  
When it's late don't stop Annie  
I will make it back

Annie I will make it
