

Jack's Mannequin, Annie Use Your Telescope

It started feeling like October
I got stranded on the road
But you know where to find me
Anytime you want me Annie

Annie use your telescope

So they made my life into a movie
As if I could forget those years
But I know where the time's gone
Just not where my mind's been wandering

Annie use your telescope

When it's late don't stop looking
When my eyes turn to glass
When it's late don't stop Annie
I will make it

Home

Is there anybody out there?
Hello?
I'm only getting farther from Earth

It started feeling like October

Annie Use Your Telescope

When it's late don't stop looking
When my eyes turn to glass
When it's late don't stop Annie
I will make it back

Annie I will make it
