

Jackie Lomax, Just The Way It Goes

I thought I knew you
And you were my friend
And now we're through, you and me
It's definitely the end

That's just the way it goes
That's just the way it goes
That's just the way it goes

I thought we had it
Covered in May
But we only grabbed at it
In those few short days

That's just the way it goes
That's just the way it goes
That's just the way it goes

If I had known what I know now
I never would have tried to try again
If I had done what I said I'd do
It would have been me who left
Instead of you

Do you remember
Before it was gone
Deep in December
Our love was the sun

That's just the way it goes
That's just the way it goes
That's just the way it goes
