

Jacky Cheung, Touch Of Love

Touch of Love

The love our hearts And dreams can afford
And when I think about
The hope that you've handed it out
I want to give back all I have And then some more
But I'm only human I can only do so much
But all the miracles we need Is just one touch,
just one touch

(Chorus) From me from you Helping someone who can't
make it on their own No one wants to be alone
at a time like this Only joy should exist
When the world gets too much
All we need, all we need is a touch of love
A touch of love

When hard times appear
When we drown in our tears
There's faith enough to see us through
Whatever rains on us We can always trust
That heaven's hand will guide us through
Yeah we're only human But we can all do so much
All the miracles we need
Is just one touch Yeah just one touch

(Chorus) From me from you Helping someone who can't
make it on their own No one wants to be alone
at a time like this Only joy should exist
When the world gets too much
All we need, all we need is a touch of love
A touch of love

It took a child to touch the world
Just think what we can do
Think of the miracles
