

# Jadis, The World On Your Side (live)

All around me I feel the sorrow  
and once again the music plays  
Listen closer, the feelings deeper  
Live tomorrow like today  
I'm believing the sounds I'm hearing  
Get the closest to my heart  
Love the nighttime, love the daytime  
The waiting's tearing me apart

You have the world on your side  
It's waiting to feed you all that you  
need to get through the day  
Somewhere to hide  
Silence will break you  
music will take the darkness away

Don't confide - lies to hide  
Who maintains discretion  
(There's more to this than  
meets the eye)  
I can see the different points of view  
Hiding from the outside; the secrets  
showing through

Don't delay - life won't stray  
It could be your saviour  
(Relying on the one to love)  
Love can change the different  
points of view  
Listen to it closer  
Music stays inside of you

All around me I feel the sorrow  
And once again the music plays  
Listen closer, the feelings deeper  
Live tomorrow like today  
You have the world on your side  
It's waiting to feed you all that you  
need to get through the day  
(You have the world)
