

# Jag Panzer, Take To The Sky

(Written by Broderick & Conklin)

Orders and runway cleared, given the green to go  
Instruments glowing amber red  
Light up the turbine engines, they scream and start their burn  
G-forces push my heart deep into my chest

Take to the sky, Ten miles high  
Stealthily we fly, Take to the sky

Upon reaching altitude earth seems so small below  
Silent, invisible black death from above

Laser guided, automated, precise computer control  
The enemy blind and unprotected  
Pinpoint accuracy certain death sent down below  
No mercy, no regret for the unknowing foe

Mission completed heading for home  
Objective neutralized  
One more kill, one more scar for her side
