

Jamai, You've Got A Way Without Words

It's nothing that you say
But It's okay I know,
Yes I know

What you mean and when
I love you isn't spoken
Isn't spoken

Your heart is shouting out
A promise never made
It never left your lips
But I hear it any way

You've got a way without words,
what you do it tells me more
You've got a way of being heard
sometimes your kiss can say,
all the things that you feel,
speaking doesn't make it real
You've got a way without words

There is something about the way
how we communicate, with another
You always get it straight
O there's no need to wonder
To wonder

Cause I can hear your voice
Without any waiting
I feel around the noise
So you don't have to say it

You've got a way without words,
what you do it tells me more
You've got a way of being heard
sometimes your kiss can say,
all the things that you feel,
speaking doesn't make it real
You've got a way without words

There is no need to talk
I'm always listening
But giving the choice
I will change nothing
Cause I like you best
When you are speechless

Oh you've got a way
Sometimes your kiss can say
All the things that you feel
Soeaking doesn't make it real
You've got a way without words

Without words
