

James Arthur, New Generation

Suicide rates are higher
Everybody's going viral
Picture perfect in denial
It's the new coronavirus

I guess we never saw the warning signs
I guess we never saw the warning signs

Politicians telling lies
Politicians sniffin' lines
Pick a side you left or right?
What a way to start a riot!

I guess we never saw the warning signs
I guess we never saw the warning

With a little bit of you
And a little bit of me
I feel a new sensation
Let's start a new generation!

With a little bit of me
And a little bit of you
I feel a new sensation
Let's start a new generation!
Let's start a new generation!

Bore us while we're locked inside
Sort of trumps just Biden time
Putin on a spree of violence
Genocide and Jesus Christ

I guess we never saw the warning signs
I guess we never saw the warnings

With a little bit of you
And a little bit of me
I start a new sensation
Let's start a new generation!

With a little bit of me
And a little bit of you
I feel a new sensation
We are the new generation!

The kids on the Internet are running the world!
The kids on the Internet are running the world!
The kids on the Internet are running the world!
The kids on the Internet are running the world!

The kids on the Internet are running the world!
The kids on the Internet are running the world!
The kids on the Internet are running the world!
Let's start a new generation!

The kids on the Internet are running the world!
The kids on the Internet are running the world!
The kids on the Internet are running the world!
Let's start a new generation!

Let's start a new generation! (Oh, fuck it!)
