

James Bonamy, Little Blue Dot

(S. Longacre/R. Giles)

One day this light
Came shooting through the stars
Down through the rain
And right into our hearts
Well we must have said
The same prayer
For love so good
That it's always there

And every tear we cry
Every word we say
Every dream we try
And every step we take
Someone up in heaven's
Lookin' down on this room
Through the long dark night
With a round white moon
At two people
Givin' everything they got
To a big ole' love
On a little blue dot

Somehow I knew
I would find you that day
Love you this long
And hold you this way
Well, baby right from the start
It was obvious
This love is bigger than both of us

And every tear we cry
Every word we say
Every dream we try
And every step we take
Someone up in heaven's
Lookin' down on this room
Through the long dark night
With a round white moon
At two people
Givin' everything they got
To a big ole' love
On a little blue dot

When I stop to think about
How big this world can seem
Well, I'm still amazed at how
We're livin' in this dream

And every tear we cry
Every word we say
Every dream we try
And every step we take
Someone up in heaven's
Lookin' down on this room
Through the long dark night
With a round white moon
At two people
Givin' everything they got
To a big ole' love
On a little blue dot
