

James Young, Let's Do It Everywhere

Loving you girl is like fatal attraction
I can't find the switch to turn off the action
Everywhere we go you just want to make love
Your imagination's a cut above, baby

Every day of the week, every hour of the day
One thing's on your mind, and you say

Daytime, night time, any time's the right time
Let's do it everywhere
Inside, outside, no reason to hide
Let's do it everywhere

Everywhere I go I feel your hands on me
You got my engine racing, and you love to tease
It's the only thing that's ever on your mind
Except maybe trying for just one more time

Every day of the week, every minute, every second
One thing's on your mind, and you say

Daytime, night time, any time's the right time
Let's do it everywhere
Inside, outside, no reason to hide
Let's do it everywhere

Hard to handle, hard to please her
I'm working day and night, she says I just tease her
I bring her to the peak of satisfaction
I need rest, she wants action
