## Jean Shepard, Are You Certain?

Are you certain when you say you care do you love me with some love to spare I'm gonna ease right out of the one side of love affair

So be certain when you say you care Are you certain will your lips be true do you need me just as I need you

Don't wanna lose my heart and wind up all alone and blue So be certain that your lips are true

Are you certain you see only me there's no other none a love can be Say I'm the only one or I freeze and stay clear and free

So be certain you see only me so be certain you see only me
