

# Jedi Mind Tricks, Neva Antiquated (Dark Jedi Ren

[Ikon / Sun Pharaoh]

Complexities bring entities when hardcore be the factor  
Physically shattered by the cause of the macrocosm distracter  
Fractured by my supernatural forces, face loses  
As I break backs like Superman on horses  
Word ajar, ancient warrior like Thor  
Spiritual like the Ibis God Thor  
Complex construction by the technician  
Will dismantle your collective mind, Enemy of Mankind  
With Egyptian, archeological finds  
Dwelling in the dungeon of time  
Monomaniacal beat seeker  
Swarming like locust into your speaker  
Examining communications systems with cybernetics  
Key notes of my flows will get froze or cryogenics  
East Coast domination for the D-U-B masses  
Gathering at black masses to gain knowledge of the clashes  
Of past rhythmic masters, would end up bending, never-ending like the sky  
One-point twenty-one gigabytes to defeat me like Marty McFly  
So why, would you battle with the recipe  
Got rappers sweating harder than some retards on Jeopardy  
One time for your mind, no doubt

[Hook]

I Am The Begining And Ending Of What is War, And I Am The beginning and ending of what is raw.  
(Return of the Jedi)  
I Am The Begining And Ending Of What is War, And I Am The beginning and ending of what is raw.  
(Return of the Jedi)

My brainstorm will swarm into your sections  
Scientific lessons and my possession unload within my session  
Injections infesting insight am I causing tension  
Blessing mad crews is my obsession  
Intentions to make you change professions  
Wisdom imprison dejects leaving you vexed  
My cerebral vortex rips erects when I infest (bless)  
We deep scriptures that's evil  
There's ? my cerebral, then ? remain imperial  
Unbelievable lyricism will leave incisions  
Cause pain like circumcision as you recognize (the realism)  
The G-O-D verbally damage M.C.'s  
Tragically come and battle me, bare witness to insanity  
My corrupted mentality, plan to slaughter your family illmatically  
I bless the microphone with strategy  
Your alliance is left in silence, victim of verbal violence  
Deadly vocabulary, the God be dropping science  
No doubt

[Hook]

Amongst the illest individual's, I bless the mentals of criminals  
With materials formulated to penetrate cerebrals  
I'm lethal, imperial type scriptures infiltrate, then split you  
Simulating your nugget when I hit you  
Emerging from the mist is not individual but four  
Hardcore concepts causing everything to be raw  
8804 AD causes misery that be abominable  
Evil like three times hexagonal  
Test my squadron and watch your macrocosm turn to particles  
Non-particles are non-particles  
Like the nucleus of an atom  
The corpuscles which carry the oxygen from the lungs gather patterns  
Energy form the soul  
[Fade:] Black soul like spirits of Kukido
