Jeff Lynne, Let It Run

Your coming up the walk,
Your banging on the door
The circuit's overloaded
And they're coming through the floor

Let it run, let it run, let it run
And out of the band comes a guitar man
Singing come on let it run

Called up alone gathered up the light
Told everyone that everything's was going fine

Let it run, let it run, let it run
From out of the corner came Johnny be good
Singing come on let it run

Whoa, and up above the stars are bright
And well let it run let it run tonight

Up above the stars are bright
Let it run let it run tonight, tonight, tonight

It's getting louder now it's pounding at my brain
And if it ever stops I'm gonna start it up again

Let it run, let it run, let it run
From out of the valley came long tall Sally
Singing come on let it run

I'm already gone let it run
Come on let it run
