Jem, Got It Good

If I had one wish

If I had one wish

It would be to be free of this fighting all around

'Cause it's so wrong

And it could be so right

In my heart I know we're here to grow, to love, to give, to learn, to live...

And I believe in miracles

Open up your eyes

Got a soul, got a mind

Got a heart that beats in time

You've got a smile, got a voice

Got the gift of love

You've got it good

Don't forget how lucky you are

Darling, darling, use it to connect with everyone

Don't you know we're golden

Covered up with mud

One day you'll see the truth that we all share the same blood

Supposed to love thy neighbour

Together we should stand

Whatever colour, race or creed

Come on and hold my hand

'Cause I don't differentiate

We're all the same to me

Got a soul, got a mind

Got a heart that beats in time

You've got a smile, got a voice

Got the gift of love

You've got it good

Don't forget how lucky you are

Darling, darling, use it to connect with everyone

And it's getting so serious

Crushed my heart in pieces

But I know I'm not alone in wanting peace

Not alone

And if you feel what I feel

Raise your hands with me

Got a soul, got a mind

Got a heart that beats in time

You've got a smile, got a voice

Got the gift of love

You've got it good

Don't forget how lucky you are

Darling, darling, use it to connect with everyone

Got a soul, got a mind

Got a heart that beats in time

You've got a smile, got a voice

Got the gift of love

You've got it good

Don't forget how lucky you are

Darling, darling, thank you for the moments that we had
