

# Jerry Cantrell, Locked On

Everything you heard I did and maybe then some ok  
Does it make you happy and now is it out of the way?  
Everything you heard I done and probably then some ok  
Does it really matter of course I took it all the way  
What more can I say  
Locked on--what's the deal?  
Faded rock star, push and needle  
You don't know, well that's alright  
You do your thing, I'll live my life  
Every word you read is true, baby I won't deny  
Don't you push me over, I ain't even finished my ride  
Every word you read is true and maybe that is a lie  
Strap session closing and I'm a-going out of my mind  
What more can I say  
Locked on--what's the deal?  
Falling rock star, push and needle  
You don't know, well that's alright  
You do your thing, I'll live my life  
Locked on--what's the deal?  
Faded rock star, push and needle  
You don't know, well that's alright  
You do your thing, I'll live my life  
Every song I wrote I meant what I said at the time  
Yeah I spent some time looking death right in the eye  
Every song I wrote I captured a fragment of time  
Dying a little bit makes you appreciate life  
Nothing more to say  
Locked on--what's the deal?  
Faded rock star, push and needle  
You don't know, well that's alright  
You do your thing, I'll live my life  
Locked on--what's the deal?  
Falling rock star, push and needle  
You don't know, well that's alright  
You do your thing, I'll live my life  
Locked on  
Locked on
