

Jessica Sheely, In Good Time

We can make believe
That everything makes sense
And there's no need to worry now
Coz' you're not like all the rest

Living with only your heart
A new day arrives & its only the start
Of Something already here
The sky's open up
And its perfectly clear

*It's all waiting for you
You can take the world
And give it your own name
It's all there waiting for you
No matter what you find
You will never be the same

Smile for the picture my dear
Its another day, another dream, another new year
And who knows what you'll find
But it's all comin' round
All in good time

Repeat *

When you're standing alone
Facing the darkness
of the unknown (of the unknown)
I know your light will never fade away.

Repeat *

It's all waiting for you
Like flowers in the spring
The world is open wide
It's all there waiting for you
With the spirit that you bring
You will always be the one to shine

...In good time
