

# Joe Walsh, The Radio Song

I like to listen to music

I like the way that it sounds

On the radio

I like to sit in a silent place

When no one's around

And listen inside it

Inside the silence is a melody

Voices singing harmony

I close my eyes and listen carefully

The silence starts to get loud

It's like your favorite station

Playing your favorite song

Just like they do on the radio

Like they do on the radio

Inside the silence is a symphony

Every note there is in every key

The music tells me how it wants to be

I help it write itself down

I hear the way that would sound

It's like your favorite station

Playing your favorite song

Just like they do on the radio

Like they do on the radio

But the radio isn't on --

On the radio
