

Joey MacIntyre, Rain

I wonder how I get along
I wonder where I might be loved
losing your way is easy to do
wandering around without a clue

If there's a way, I don't know where
If there's a why I'm standing here
Losing my mind, it's easy to do
Where are you

And the rain falls down
It's the only way it gets better
When the rain is falling down
Telling me that I'm gonna make it through

I never thought of what it cost
All of the time, I might have lost
So much to gain playing I could
Under the cats playing the flute

And the rain falls down
It's the only way it gets better
When the rain is falling down
Telling me that I'm gonna make it through

I know I will
But when will I stand up to myself and make my mind
I might not have what I have before
But I still got the rain

And the rain falls down
It's the only way it gets better
If the rain would fall down
Then i know i could make it through the night

And the rain falls down
It's the only way it gets better
When the rain is falling down
Telling me that i'm gonna make it through

Ohh yeah
It's the only way
Let it rain
Let it rain down on me
Let it rain
It's the only way
