

Johan, You Know

You know this day won't last forever
Move on and you'll forget
Tomorrow's packed with new endeavors
Get on with life she said

All I ever cared about
Thought I'd never do without
Seems a faded memory
Remnant from the past

You know my love we'll be together
For what is still to come
When time gets rough we'll make it better
You know where we came from

All I ever cared about
Thought I'd never do without
Seems a faded memory
Remnant from the past

I guess I've lingered far too long
To get it straight with you again
Could never be the one you wanted to

You know this day won't last forever
Get on with life she said
