

John Anderson, It's A Long Way Back

First date first kiss well I never will forget the way you looked that night

Parked out cross town watchin' the stars fall down

Girl your hair was soft and brown

Just before we get too far I'd hear you say

It's getting late we need to go and it's a long way back

[fiddle]

Made plans got rings and had us a million dreams where our road might lead

It wasn't long we had a truck with all of our things boxed up

Left down in a cloud of dust

And got movin' improvin' why I can't say

But suddenly it seems to be such a long way back

[guitar]

I've tried you've tried and nobody's satisfied is this where it all ends

We can't be so far down where we can't turn around pick up this love we found

Just before we get too far I hear you say it's getting late we need to go

And it's a long way Just before we get too far I hear you say

It's getting late we need to go and it's a long way back
