John Cameron Mitchell, Random Number Genera

Random Number Generation
all our feelings and thoughts
expressed in ones and in oughts
in endless spiraling chains
you can't decode or explain
cause you are so analog
god dog I eye I god dog

we're the random number generation
we are random number generated
we are random numbers

in the regime of the solid state
wheels spin when you iterate
k is x squared minus one
but .54321
when x is taken times two
that's when we're coming for you

we're the random number generation
we are random number generated
we are random numbers

Mister Little started something huge
Iggy Pop Iggy Stooge
all the children shout out,
hey here we are

we're the random number generation
we are random number generated
we are random numbers
