John Denver, Eli

This song was first released on the Spirit album. It is the only album it has been released on.

Born in the month of June No silver spoon to help you out Your Mother had you naturally Naturally's the way you came out

You know your your own mind And you show it to me Give me the high sign When you want to be free And open up my eyes To the wonders that you see

See the airplane fly
See the trees rush by
Be brave and strong when you hurt yourself
And don't you have a worry in the world

For the love that's been given you Is the one thing time can't erase And evryday it's growin' Like the knowin' smile upon your face

You're startin' out strong
You get a kick out of life
You like to sing songs
Be in the spotlight
And when everybody's watchin' you
You shine so bright

See the airplane fly
See the trees rush by
Be brave and strong when you hurt yourself
And don't you have a worry in the world

You know your your own mind And you show it to me Give me the high sign When you want to be free And open up my eyes To the wonders that you see

See the airplane fly
See the trees rush by
Be brave and strong when you hurt yourself
And don't you have a worry in the world
