

John Frusciante, Water

Water inside
We're all in water
Water we climb and run through it
Water inside
We're all in water
Reaching inside of a big death bag
When you are through danger
Ends are met and live
Where they are happens to be where they have been
When you lower placement
The strong get stronger
Where you are when you waste there's a wip hitting you
Water inside we're all in water
Water we climb and run through it
Water inside we're all in water
Reaching inside of a big death bag
Everytime I faked it
Devils crawl through me
I'm ashamed when I ignore the voice that agree
Get us all together
Where we all wish for the same thing
It's only a lie to recall beliving your body
Water inside we're all in water
Water we climb and run thru it
Water inside we're all in water
Reaching inside of a big death bag
Reach inside of a bag
