

# John Hiatt, Farther Stars

Friends of mine they don't hear  
Clocks ticking all around their ears  
They don't expect a thing  
Bridges moving while the river sings

Long lost love  
Where do we go from here  
Farther stars  
Different atmospheres

The river sings us back from the time  
Drawn to heaven with a voice so fine  
Final joys final cries  
On and off like starlight in her eyes

Long lost love  
Where do we go from here  
Farther stars  
Different atmospheres

You know your poetry kept me up all night  
Like you I didn't have the heart to die  
Still so many things left to say

Long lost love  
Where do we go from here

Death's the truth and death's a lie  
Love is your only alibis  
Mary you'll forget this soon  
Where we were and when we sang this tune

Long lost love

Where do we go from here

Farther stars

Different atmospheres

Long lost love
