

John Newman, Goodnight Goodbye

[Verse:]

As soon as the doors slammed
This silence that fell
Was all that you left me
With a story to tell
'Bout cigarettes and ash-trays
That I smoked with you

[Pre-Chorus:]

I tried to find the truth
And I ain't there with you
I never listen, I never listen
All the things you said
I'll never hear again
I should've listened, more

[Chorus:]

You said goodnight
I know you really meant a goodbye
We just watched it burn
Know we could've kept love alive
I should be loving you
I should be loving you

[Verse:]

Your makeup on my sheets
Your clothes on the floor
The photos that I'll keep
How we were before
Before I took you for granted
Before the memories were torn

[Pre-Chorus:]

I tried to find the truth
And I ain't there with you
I never listen, I never listen
And all the things you said
I'll never hear again
I should've listened

[Chorus:]

You said goodnight
I know you really meant a goodbye
We just watched it burn
Know we could've kept love alive
I should be loving you
I should be loving you

[Bridge:]

It's time to confess, I've been at my best
But this time I won't get it wrong
It's time to confess, I've been at my best
But this time I won't lead you wrong

[Chorus:]

You said goodnight
I know you really meant a goodbye
We just watched it burn
Know we could've kept love alive
I should be loving you
I should be loving you
