## John Prine, All Night Blue

You've got a life somewhere without me I've gone on without you It hasn't been easy getting used to Being lonely and tonight is an all night blue And I wonder how you look and who looks at you In your nightgown I can almost feel your body Your warm and loving body when I lay down

## Chorus:

It's an all night blue Remembering you It's an all night blue Wondering who's loving you ... all night

Well it hurts me to see that you're
Happy without me cause I still need you
I just drank up my heart
Set it empty on the table 'cause I
Ain't got nothing better to do
Still I wonder how you look and
Who looks at you every morning
I can still feel your warm breath
You kissing me on the chest
I'm just dreaming

Chorus
