

JoJo Siwa, Iced Coffee

I need my iced iced coffee baby

Wake up in the morning, let's go
You can flip me over like a fresh pillow
We be underneath the sheets getting sweet n low
Shooting espresso, cinnamon french toast

Halo hanging off the bedpost
You're a better view than the Malibu coast
I be getting lucky charms, wanna taste your rainbow
Take a sip, hello, make it drip, hello

I can't function without you
I'd be nothing without you
Hopped up I'm all about you
Ever since I found you
Ya

I need you like, need you like
Iced iced coffee
First thing in the morning
Again in the afternoon
I need you like, need you like
Iced iced coffee
Caffeinate it for me
Keep me up all night with you
I need you like, need you like

A little bit of sugar and cream
A little bit of you and I'm getting no sleep
French pressed up against my chest, oui oui
If you know what I mean and you know what I need

Like the way you grinding my bean
Something bout you, turn me into a fiend
Got me feeling brand new, get me going full steam
Know we're cool baby, I ain't spilling no tea

I can't function without you
I'd be nothing without you
Hopped up I'm all about you
Ever since I found you
Ya

I need you like, need you like
Iced iced coffee
First thing in the morning
Again in the afternoon
I need you like, need you like
Iced iced coffee
Caffeinate it for me
Keep me up all night with you
I need you like, need you like

Iced iced coffee baby
I need my iced iced coffee baby
You know you drive drive drive me crazy
I need you like, need you like
Iced iced coffee baby
I need my iced iced coffee baby
You know you drive drive drive me crazy
I need you like, need you like
