

# Jon B, Do It All Again

I looked in the mirror today  
Took a good look at my face  
And all I guess that I can say  
Is I'm just a man trying to find his way

It's been a long and windy road  
But at least I got you to hold  
And I've become the man I am  
Cause all our troubles made me understand  
It's been all of our lives

All of our lives I wanna stay this way  
Our Lord knows we're gonna make mistakes  
But I'll give up everything to make it through  
And all our lives ain't been the easiest time  
And Lord knows it's been an up hill climb  
But I'll do it all again to be with you

Ever since we went through with the plan  
I'm feeling like I've become a better man  
Cause I'm giving up that part of me  
That held me back from being free

And now when we kiss I feel your soul  
I'm putting back the pieces others stole  
And now nobody can hurt  
My baby cause we make it work

I can't hold the rain back when it starts to storms  
(Just let it rain)  
You don't have to fight your feelings anymore  
(We can learn from the pain)  
When I'm all alone I count the reasons why  
Just till you think girl, you'll be alright  
You just take your time  
All of your live

All of our lives I wanna stay this way  
Our Lord knows we're gonna make mistakes  
But I'll give up everything to make it through  
And all our lives ain't been the easiest time  
And Lord knows it's been an up hill climb  
But I'll do it all again to be with you

All of our lives I wanna stay this way  
Our Lord knows we're gonna make mistakes  
But I'll give up everything to make it through  
And all our lives ain't been the easiest time  
And Lord knows it's been an up hill climb  
But I'll do it all again to be with you

I'm not going away girl  
Love is just a thought away  
When I go away girl  
How much I love you  
How much I do love you baby

All of our lives I wanna stay, stay this way  
I'm gonna make, make it through yeah  
That's why all of our lives, ooh ooh  
We are gonna make it through, make it through baby  
Ooh ooh ooh ooh ooh ooh
