Jonezetta, The Love That Carries Me

She found a way to get away from all Her stupid little things She says it's hard to stay away from all The love that carries me

Sorry, sorry, but my words mean nothing When the chorus dies does it kill you to be alone?

So get the town to buy the song they'll play As many times as they can She'll sing the melody over me But baby don't understand

No baby never undetstands The love that carries me

Now they're never playing It's so frustrating How they play it again And play it again The love that carries me

Play it out! Sing it out! Alone again
